CONTENTS VOLUME 85

Vol. 85 No. 1 2003

GIUSEPPE D. RACCA / New Challenges to Trajectory Design by the Use of Electric Propulsion and Other New Means of Wandering in the Solar System 1–24

G. T. OMAROVA and T. B. OMAROV / Reconstruction of a Non-Stationary Potential of Gravitating System on Given Evolving Orbits 25–35

DENNIS D. McCARTHY and BRIAN J. LUZUM / An Abridged Model of the Precession–Nutation of the Celestial Pole 37–49

ANATOLIY P. MARKEEV and BORIS S. BARDIN / On the Stability of Planar Oscillations and Rotations of a Satellite in a Circular Orbit 51–66

SANDRO DA SILVA FERNANDES / Notes on Hori Method for Canonical Systems 67–77

KRZYSZTOF GOŹDZIEWSKI / Stability of the Triangular Libration Points in the Unrestricted Planar Problem of a Symmetric Rigid Body and a Point Mass 79–103

Vol. 85 No. 2 2003

C. POLYMILIS, G. CONTOPOULOS and A. DOKOUMETZIDIS / The Homoclinic Tangle of a 1:2 Resonance in a 2-D Hamiltonian System 105–144

ESTHER BARRABÉS and GERARD GÓMEZ / Three-Dimensional p–q Resonant Orbits Close to Second Species Solutions 145–174

LIAM M. HEALY / Orbit Propagation with Lie Transfer Maps in the Perturbed Kepler Problem 175–207

Vol. 85 No. 3 2003

SŁAWOMIR BREITER / Extended Fundamental Model of Resonance 209–218

GEORGE BOZIS / Certain Comments on V. Szebehely's Paper 'Open Problems on the Eve of the Next Millennium' 219–222

MICHEL HÉNON / New Families of Periodic Orbits in Hill's Problem of Three Bodies 223–246

D. D. CARPINTERO, J. C. MUZZIO, M. M. VERGNE and F. C. WACHLIN / Chaotic Orbits in Galactic Satellites 247–267

V. A. BRUMBERG / Special Solutions in a Simplified Restricted Three-Body Problem with Gravitational Radiation taken into Account 269–291

Vol. 85 No. 4 2003

V. G. TSOGAS and A. G. MAVRAGANIS / Some Equilibrium of the Restricted Three-Body Problem with Axial Symmetric Primaries and a Gyrostat as Infinitesimal Mass 293–309

REGINA MARTÍNEZ and ANNA SAMÀ / On the Centre Manifold of Collinear Points in the Planar Three-Body Problem 311–340

SERGEY M. POLESHCHIKOV / Regularization of Motion Equations with *L*-Transformation and Numerical Integration of the Regular Equations 341–393

Instructions for Authors 395–400

Volume Contents 401–402
